Part 1: Introduction

1 Introduction 10
  1.1 Purpose, contents, and scope of the book 10
  1.2 Environmental health risks in emergencies 16
  1.3 Needs and standards 17
  1.4 Public-health approach to water supply and sanitation in emergencies 18
  1.5 Partners in the humanitarian response 22
  1.6 Working with disaster-affected people 23
  1.7 Social diversity 25
  1.8 The local context 27

Part 2: Programme Management

2 Assessment 30
  2.1 Purpose 30
  2.2 Sources of information 30
  2.3 Field assessment techniques 39
  2.4 Interpreting and presenting assessment information 43
  2.5 Assessment strategy 44
3 Planning and implementation 47
  3.1 Project plans, budgets, and proposals 47
  3.2 Phased response 52
  3.3 Planning horizons 53
  3.4 Co-ordination and integration 54
  3.5 Contingency planning and preparedness 56
  3.6 Operation and maintenance 59
  3.7 Handover 59
  3.8 Closing down emergency settlements 60

4 Monitoring, evaluation, and reporting 62
  4.1 Monitoring 62
  4.2 Evaluation and review 67

5 Managing programme resources 72
  5.1 Materials and equipment 72
  5.2 Field staff 80
  5.3 Administration 84

Part 3: Technical Chapters

6 Emergency settlements, site selection, and planning 88
  6.1 Introduction 88
  6.2 Site selection 89
  6.3 Physical planning of emergency settlements 94
  6.4 Settlement location and physical layout: implications for water supply
      and sanitation 96

7 Hygiene promotion 99
  7.1 Introduction 99
  7.2 Assessment 101
  7.3 Setting objectives and choosing indicators 102
  7.4 Implementation 103
  7.5 Programme monitoring 107
  7.6 Training 107
  7.7 Community management 108
8 Water supply 110
  8.1 Introduction 110
  8.2 Planning and implementation 112
  8.3 Water sources 115
  8.4 Water treatment 119
  8.5 Water pumping 123
  8.6 Water tankering 126
  8.7 Water storage 127
  8.8 Water distribution 128
  8.9 Water collection and use 131
  8.10 Water testing 134

9 Excreta disposal 138
  9.1 Introduction 138
  9.2 Phased response 139
  9.3 Organisational options 142
  9.4 Staffing needs 147
  9.5 Monitoring latrine programmes 149
  9.6 Technical options 149
  9.7 Options for problem sites 161

10 Vector control 163
  10.1 Introduction 163
  10.2 Assessment for strategies to control vector-borne disease 167
  10.3 Planning a vector-control strategy 168

11 Managing solid waste 171
  11.1 Introduction 171
  11.2 Health risks of solid waste 171
  11.3 Managing solid waste 171
  11.4 Waste from health centres 177
  11.5 Dead bodies 177

12 Drainage 179
  12.1 Introduction 179
  12.2 Waste water 179
  12.3 Storm water 181
  12.4 Community involvement 183
